

# Textile labels explained

Fortunately, sustainability is on the agenda of various brands in our range. However, all this attention can lead to difficulty in distinguishing one quality mark from another. This is why HMZ Fashiongroup lists the textile labels for you.

SPQ stands for Stedman Proofed Quality. This is the certificate with which Stedman wishes to propagate all items are subject to strict quality controls. This applies to both the materials and the products.

Stedman's textile products and components have been tested on harmful substances. In this way they can guarantee high product safety. At the moment, Stedman does not have the Oeko-Tex-100 certificate for the Biker and Quilted jackets. They do state these items are produced according to the same strict specifications.

The ecological styles with this label are made from 100% OCS certified ring-spun organic cotton. No toxic pesticides and fertilizers were used during the cultivation of the environmentally friendly cotton. This certificate is issued by Control Union Certifications (CU 819645).

Stedman is a member of Amfori, an international professional organization committed to open and sustainable trade. Legal, humane and ethically responsible production are the main pillars of the Business Social Compliance Initiative (BSCI). This means that child labor, environmental nuisance and abuse are prohibited. Stedman must therefore comply with the regulations with regard to working hours, health, safety and the environment.
