

A woman with long brown hair, wearing a bright red hoodie and dark pants, stands against a white brick wall. She is smiling and looking towards the camera. To her left, the back of a man with curly hair wearing a grey hoodie is visible. The overall scene is brightly lit, suggesting an outdoor or well-lit indoor setting.

Next Level Apparel

Symbols

Items with this icon indicate that they will be made from organic OCS certified cotton or recycled GRS certified recycled polyester from 2026 onwards. This allows for a transition period to adjust production.

A tear-out label or no branded label in the neck.

In transition to ready to brand.

Fitting

Body fit

Our body fit styles are slim cut and rather clinging to your body. Contoured and side seamed for a more next to body fit.

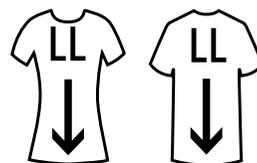

Regular fit

These styles follow your body in a flattering way, without clinging to it. The sleeves and shoulders fit closer to the body. The regular fit is currently the most popular shape.

Comfort fit

Drapes away from the body for a relaxed fit and extra movement. A timeless fit has a generous, comfort forward cut and fuller sleeves for freer movement throughout. This fit has a comfortable width.

Longer length

In addition to the different sizes, these T-shirts are longer than standard size, which ensures a pleasant wearing comfort.

What we do

In this catalogue, you will find our own brands Lemon & Soda and Private Label by Lemon & Soda, as well as Gildan, Stedman and Next Level Apparel. 25 employees take care of purchasing, sales, administration and shipping from our location. We distribute our collection exclusively through an extensive dealer network.

With our own brand Lemon & Soda, we have gained an important position in the Dutch market for promotional and corporate clothing. With Private Label by Lemon & Soda, we put together unique items or a complete, tailor-made corporate clothing line. This allows us to always deliver customised work. The brands are sold to end customers through an extensive dealer network. Good cooperation between the purchasing, sales and marketing departments ensures innovation and the right tone in online and offline communication.

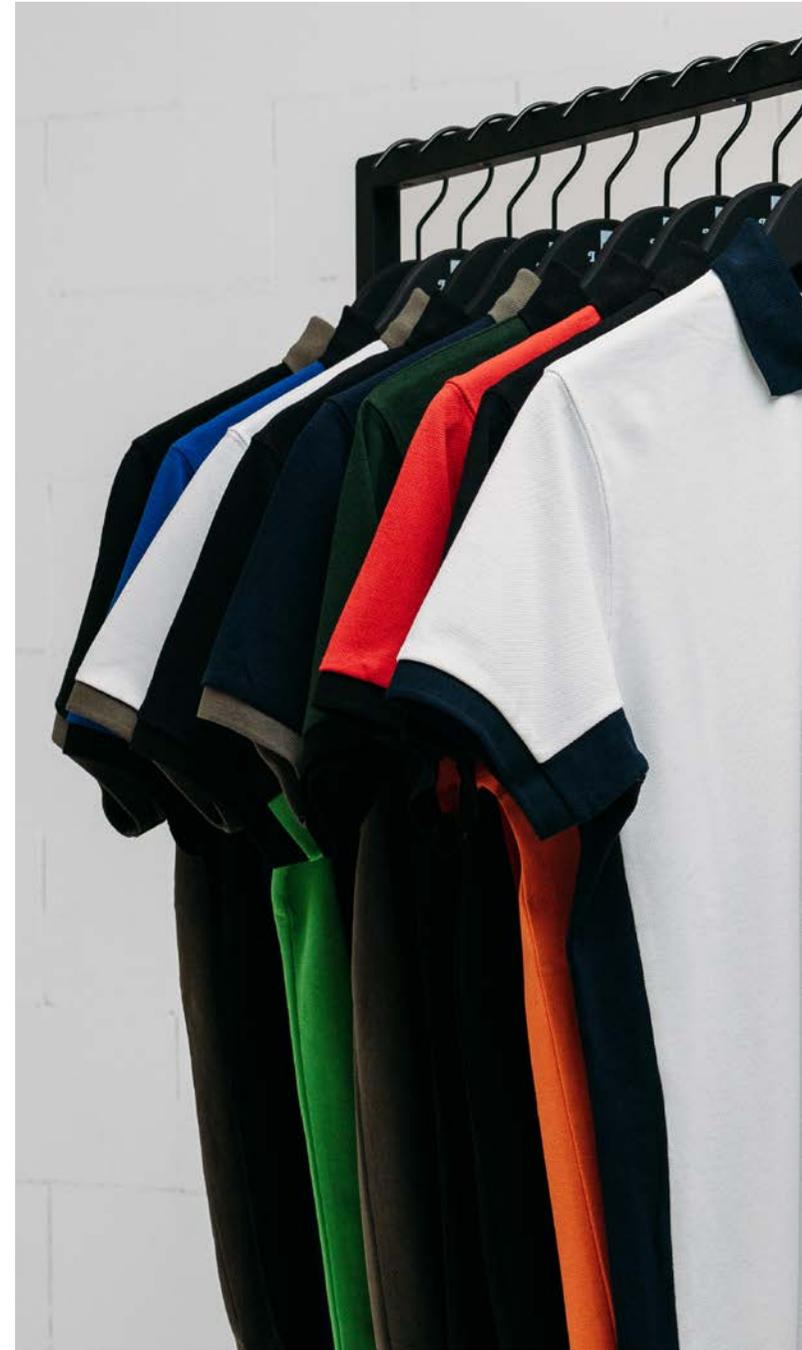

Our catalogue, The Choice, is one of our best-known spearheads and has been a comprehensive and clear reference work since the early years. Conscious entrepreneurship is central to The Choice.

Our future

Thanks to the high level of comfort and quality, we want you to enjoy our clothing for a long time. With The Choice, we strive for a cleaner, fairer and more innovative future. Our priority is to maintain responsible and safe working conditions and to comply with applicable environmental standards. We only work with factories and partners who share our values of a humane and safe workplace. We attach great importance to sustainability and have taken many measures to improve the environment. We know we still have a long way to go, but we are determined to increase our efforts in the area of sustainability.

That is why we have implemented an international code of conduct and Fair Trade rules that all our partners in the production chain must comply with. The Choice offers only green brands.

Most items in our range from our brands Lemon & Soda, Private Label by Lemon & Soda, Gildan, Stedman and Next Level Apparel are produced in accordance with Oeko-Tex standards and the requirements of the ILO Convention.

Our brands

In today's world, it is more important than ever to present your company in a professional manner. Lemon & Soda has a strong market position with four collections: Workwear, Originals, DeLuxe and Private Label, each with its own characteristics.

It offers an extensive selection that is stylish, functional and comfortable. This 100% Dutch brand has its origins in the 1980s and the current collection includes T-shirts, poloshirts, sweaters, shirts, outerwear and underwear.

The collection is an excellent basis with an eye for a sustainable society.

GILDAN®

Gildan is a Canadian family business that was founded in 1984. Since then, the brand has developed a wide collection consisting of T-shirts, poloshirts and sweaters.

The collection focuses on men, women, children and toddlers and is available in a diverse colour palette: from striking, bright colours to subtle shades.

STEDMAN®

For more than sixty years, Stedman has been a steadfast and attractive brand in promotional clothing. The American brand has earned this position thanks in part to the quality of its garments.

The collection includes T-shirts, polo shirts, sweaters & sweatpants, jackets and sportswear. In addition, they offer a complete sustainable collection made from organic cotton and recycled polyester. Items are suitable for men and women, young and old.

Next Level Apparel brings the vibrant spirit of California to Europe and is your destination for top-quality ready-to-brand clothing. Beloved in America and now available to you!

Next Level Apparel specialises in creating clothing that is not only comfortable, but also perfect for printing. The collection of T-shirts and sweatshirts for him and her offers a wide range of modern colours to suit your style and mood.

Private Label by Lemon & Soda designs and manufactures corporate, promotional, and merchandising clothing that is tailored entirely to your wishes and requirements for a strong and recognisable look.

With years of experience in the clothing industry, we ensure that the process is simple and efficient for you and guide you every step of the way. From the design and selection of the right quality fabrics and colours to the finishing touches on your logo and other artwork.

We ensure that the items perfectly match your brand identity.

Always on the move with softshell

In wintertime or when working outside water resistant clothing is a must. The best protection against nature's way? Softshell! Softshell clothing offers warmth, comfort and is water repellent. It breathes and is flexible, making this type of material very suitable for outdoor activities, such as exercise and work.

There is a type of softshell for every occasion. To make the right choice, keep in mind the Thermoplastic Polyurethane (TPU), water resistance and breathing properties. It will help the wearer to stay warm and dry during activities.

3 Layer softshell bonded - 4 Way stretch
Water repellent Water resistance

1. **Outside**
(40% Recycled) Polyester - Elastane --- poplin
2. **TPU breathable membrane**
 - Windproof
 - Waterproof (8.000 mm)
 - Breathable (5.000 gr/m²/24h)
3. **Inside**
100% polyester --- microfleece (anti-pilling)

Back to School

Back to School Project Bangladesh has a very good network of schools at all levels. Children can receive education at very little or no cost. Yet there are families who do not see the opportunities that education offers. They focus on short-term profits and allow children to drop out of school to work in the household or on the farm. That is why The Choice founded the Back to School Project together with a manufacturer in 2007.

Change the future

The local manual recognized extreme poverty in his village of Gonopaddi, an agro-based and underdeveloped district on India's electronic border. Most children in this region are drop-out students. Many families do not have enough to eat. The lack of education leads to this poverty because they cannot sustain themselves in the long run. Help was needed to change the social and economic situation.

Stimulating children's potential

The Back to School Project noticed these problems and created a program aimed at dropout students. The philosophy of the program is to transform each child into their own change agent. It is not limited to learning; it is also aimed at boosting one's potential. Good practice, helping others and living a healthy life are all part of the project. The goal is to instill self-esteem and value of education in children so that they can influence the economic scenario and engage in social welfare. The Back to School Project has started a huge development; some group 1 students who started the program ten years ago are now studying at the university. These original school leavers aspire to become doctors, engineers, ministers or parliamentarians rather than work in the household or on the farm.

Success of the project

The first year of the Back to School Project started with twenty students with only two teachers. Unlike mainstream schools, there were incentives to go to school: free eggs and biscuits and extracur-

ricular activities to develop other social and cultural skills. They also received soap and toothpaste for health and hygiene. Because of the great results, more and more students wanted to participate and today there are more than 200 students, 20 teachers and computer training programs for the basic courses. Students up to and including class 4 are taught by students of the higher class. Pupils from group 5 come to the main building to attend lectures given by regular teachers.

Make your own change

Together with the manufacturer, The Choice helps these children to transfer money themselves. Today there are no real school leavers in Gonopaddi and all children are included in the Back to School Project. They have become their own change agents with the ability to transform the Sherpur district for a brighter future.

In the poverty-stricken village of Gonopaddi, most students learn English by memorizing exercises from their textbooks. After twelve years, most of them still cannot understand and read English. The Back to School English Club was established to help these students - ranging from grades six to grades eleven - develop the English language. Two months after the start of the club, the students have let go of their fears and are fully committed to learning English, driven by their enthusiasm to overcome illiteracy.

Goals of the initiative

- Improve students' understanding and communication skills in English.
- Improve their ability to network.
- Develop leadership qualities in students.
- Progression students in the field of technology.

Sustainable Lemon & Soda

Step by step towards a more sustainable future

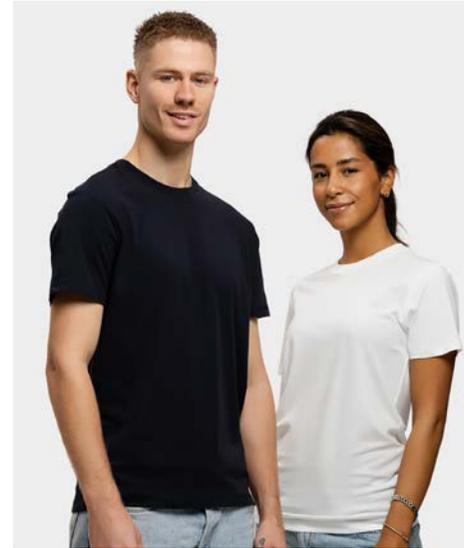

The Lemon & Soda collection stands for comfort, style and quality. In 2026, we will take an important step towards reducing our ecological footprint without compromising on comfort and quality.

In the course of 2026, we will switch the collections below to sustainable cotton and/or recycled polyester. You can also recognise these items in The Choice by the green label on the items.

Together we are driving change
Quality, comfort and awareness.

Clothing with a future

The Choice catalog has been a well-known and major player in the promotional market for many years. In the coming years, with a view to sustainability, we will also be clearly visible online in addition to the catalogue.

This The Choice is printed on FSC certified paper. This environmental certificate fits within our philosophy of taking responsibility as a company for our role within society and the living environment.

The Choice focuses on economic, social and living environment needs. Sustainability is an important pillar of the articles in The Choice. Our products are tested for longevity. The origin of materials is transparent and origin and fair working conditions are taken into account. Stedman has a line made from recycled material.

But it's not just our products where we implement sustainability. It also continues within business operations. Our aim is to install solar panels on the business premises by 2024. Since last year, there have been charging stations in front of the building for electric cars and we use green energy.

The Choice has its own large distribution center where used plastic is collected and recycled. Cardboard is reused and our employees think about the use of non-reusable materials.

Since 2023, The Choice has been affiliated with Stichting UPV Textiel. This foundation was established in response to the Decision on Extended Producer Responsibility (UPV Textiel) in the Netherlands, which holds importers and textile producers accountable for collection, recycling, and reuse. Over 650 companies have joined this collective initiative, currently representing more than 70% of the market. The foundation collectively organizes the collection and processing of discarded textiles to efficiently, effectively, and affordably meet the UPV obligations.

The Choice is for a livable future and takes nature and people into account.

Sustainable choices for a better future

From 2026, we will be taking an important step towards sustainability. A large part of our collection of T-shirts and polo shirts, including our bestsellers from the cotton/elastane collection, will switch to organic cotton and/or recycled polyester. In doing so, we are consciously investing in a better future for our customers, for the people who make our clothes, and for our planet.

Why organic cotton?

Organic cotton is grown without harmful pesticides and artificial fertilisers. This means healthier soil, cleaner water and better working conditions for cotton farmers. Organic cotton is just as comfortable and pleasant to wear as regular cotton, with the added bonus of the positive vibe behind it.

The power of recycled polyester

By using recycled polyester, we give plastic bottles and textile fibres a second life. This reduces waste, saves raw materials and significantly lowers CO₂ emissions. The new shirts delivered in 2026 are literally made from recycled materials, without compromising on quality or sustainability.

Softshell jackets: PFC- and fluorine-free

Our softshell jackets are now completely PFC- and fluorine-free. These chemicals were traditionally used for their water- and dirt-repellent properties, but they are harmful to the environment and health. We choose safer alternatives that are just as effective, so you stay dry and comfortable without hidden dangers to you and nature. In addition, they are made from recycled post-consumer polyester (often abbreviated as rPET or PCR polyester) made from waste material that has already been used by consumers and then collected. This type of recycled polyester is a more sustainable alternative to new (virgin) polyester, which is made from petroleum.

Together we are building a sustainable world

This step is more than a product improvement; it is our promise. A promise that we take responsibility for our impact on the world. By choosing more sustainable alternatives, you are actively contributing to a greener future.

Lemon & Soda and Lemon & Soda Private Label Concept produces and distributes at the lowest possible cost, while considering sustainability and inclusiveness for people and clothing. We strive for the optimal control of all business processes. This allows us to enable financially healthy production and distribution of clothing in the short and long term, in which humanity is central.

Lemon & Soda T-shirts and polo shirts are produced in factories in the Far East. These manufacturers show time and again that they have their affairs in order in terms of working conditions, safety and quality standards. They are audited annually on various points by various certification organizations that then issue certificates to the

manufacturers.

All sweaters -except the Everywear- from Lemon & Soda are produced in Portugal. Since Portugal is a member of the EU, there are still a lot of sustainable and ethical rules to comply with as an EU country and therefore a lot of rules, laws and standard are already framed.

The main advantages of producing in Europe:

1. The EU has strict environmental rules and standards for textile production, including restrictions on the use of harmful chemicals. There is also a focus on designing products that last longer and are recyclable.
2. Fair working conditions, within the EU there are strict rules regarding working conditions
3. The EU invests in technologies and systems for collecting, sorting, reusing and recycling textile waste. Separate collection of textile waste is mandatory since 2025 in all EU member states.
4. Production closer to home (within Europe) means shorter transport distances. This leads to a lower carbon footprint through reduced emissions from ships, trucks and planes.
5. The focus on sustainability and circularity stimulates the development of expertise and innovation within the EU, which can keep the textile industry competitive at global level.

Textile production in the EU contributes to a more responsible and sustainable industry, both environmentally and socially, and supports the transition to a circular economy.

Certificates

We believe it is important that our brands meet high quality standards and comply with laws and regulations. Certification increases the confidence of customers and buyers, strengthens our market position and encourages a continuous focus on improvement and professionalisation within our organisation.

WRAP (Worldwide Responsible Accredited Production) promotes safe, lawful, humane and ethical practices in production facilities

that benefit workers, manufacturers, buyers and consumers through socially responsible supply chains around the world. Oversight is conducted by third parties, which promotes accountability, transparency and objectivity.

Cotton USA is a trademark of the Cotton Council International (CCI). CCI is a non-profit trade organization

that promotes American cotton fibers and cotton products worldwide. Gildan has a Cotton USA license, most items are of American grown cotton and contain more than 50% cotton.

Bureau Veritas is a global B2B service provider. Their mission is to reduce clients' risks, help improve performance and provide innovation

support. They also facilitate clients to meet challenges related to quality, health, safety and welfare, environment and corporate social responsibility.

Global Organic Textile Standard (GOTS) is an international label that sets requirements for both the production of the fibers and their further processing into garments. At least 70 percent (Made with organic) or at least 95 percent (Organic) of the garment must consist of organically produced materials.

Supplier Ethical Data Exchange (Sedex) is a global platform that helps companies manage and improve ethical and responsible business practices within their supply chains. Sedex enables companies to share and evaluate data on working conditions, health and safety, environment and business ethics.

Stedman's ecological styles with this label are made from 100% OCS-certified ring-spun organic cotton. No toxic pesticides and fertilizers were used in the cultivation of the eco-friendly cotton. This certificate was issued by Control Union Certifications (CU 819645).

The OEKO-TEX® STANDARD 100 is an internationally recognized certification and the most important health mark for textiles.

The articles and materials, such as yarn and buttons, are tested for harmful substances and meet the comprehensive safety and quality standards and are therefore not harmful to health.

The Fair Wear Foundation was created to improve working conditions in the garment industry. This clothing industry code of conduct was developed in collaboration with industry associations, trade unions and civil society organizations. It is an independent, non-profit organization in which clothing brands, factories and their workers work together. It is qualified as a chain initiative under the sustainable procurement policy.

People for the Ethical Treatment of Animals (PETA) is the largest animal rights organization in the world. Apparel certified by PETA does not contain animal ingredients such as leather, fur, wool, silk, feathers and it is produced animal-free.

Amfori BSCI is an international association that unites international

companies and supports members to improve working conditions in their supply chains. They do this through tools, training, audits and risk assessments, and by encouraging members to work together to address common challenges.

The Sustainable Apparel Coalition (SAC) is a global nonprofit organization in the apparel, footwear and textile sectors. The SAC brings together different parties such as brands, stores, factories, charities, scientists and industry associations. Together they want to combat climate change, ensure good working conditions and contribute to a future where nature is protected.

PRIVATE LABEL
By Lemon & Soda

Private Label by Lemon & Soda

your story your style your private label

With Private Label by Lemon & Soda, we transform your brand and identity into a recognisable, high-quality garment or complete clothing line. From the first idea to final delivery, we guide you through every step to ensure the end result fully reflects your identity, target audience and brand appearance.

Our many years of experience, technical expertise and flexibility make the process simple, efficient and surprisingly creative. Whether you need a small quantity or want to develop an entire line: we think along, co-create and produce with care.

Why private label?

The result

Original, exclusive and instantly recognisable

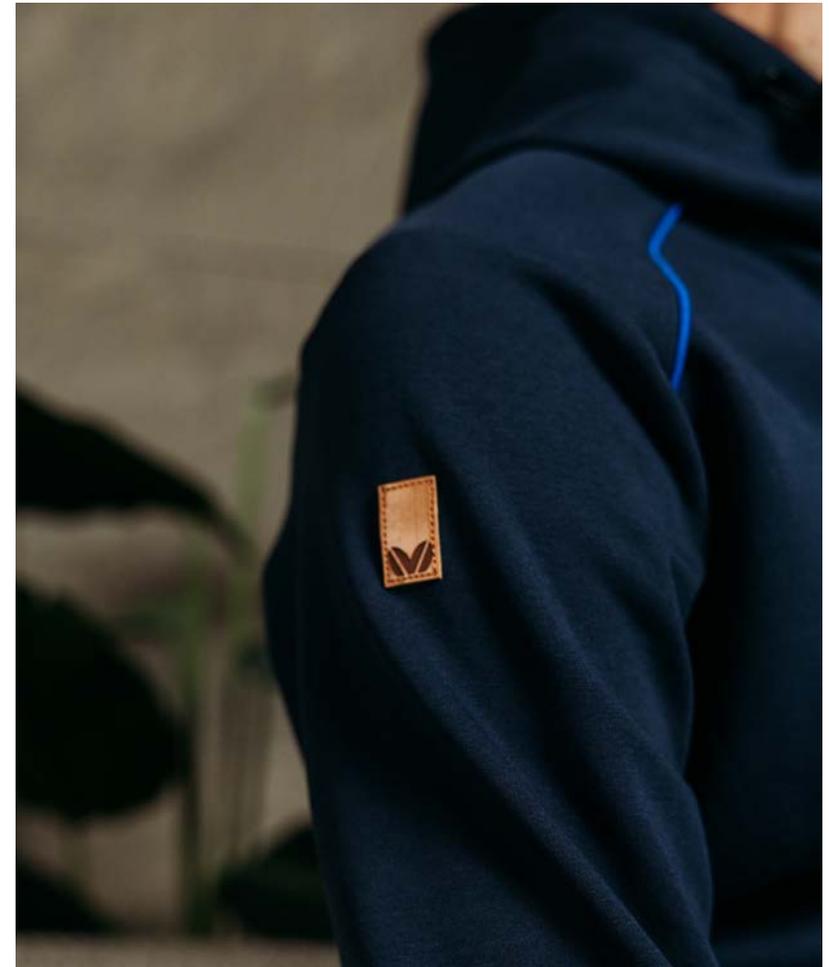

Private Label by Lemon & Soda helps brands, companies and creators develop their own clothing line that perfectly matches their identity. From fast prints or embroideries to fully developed collections - we translate your style into professional garments with character.

with your corporate identity vision as a basis, we can provide even better advice

You choose Private Label when you want to:

- create a unique look for staff, promotion or merchandise
- adapt an existing style to your own identity
- add premium details or your signature twist
- fully integrate your brand identity into fit, materials and decorations
- create clothing that truly matches your brand's personality

- Strengthen your brand identity
- Unique professional look
- More choice, more creativity
- Increased brand value
- Consistent brand style

Our **3** Options

Three levels of customisation.
From fully bespoke to quick and simple.

- 1 Full Private Label**
Complete development from A to Z.
- 2 Semi Private Label**
Existing qualities and colours, your signature details.
- 3 Print Private Label**
Fast custom branding on existing items.
Visual icons for each level (pattern - sewing machine - print)

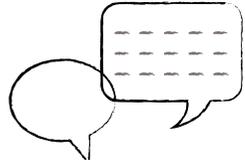

Full Private Label

Full Private Label is the ultimate form of customisation. We design your collection from the ground up: fit, patterns, materials, colours, branding and accessories.

Advantages:

- 100% custom fit
- unique fabrics & colours (Pantone dyed)
- custom-made accessories
- full brand experience
- maximum exclusivity
- low MOQ (from 250 pcs)

Unique design, unique fit
your own garment or collection

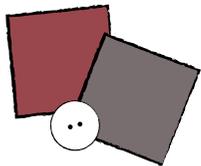

step 1 Orientation

The process starts with an initial meeting between you and our expert team. We dive into your wishes and needs for your custom clothing. We discuss your ideas and ask questions to get a clear understanding — such as preferred styles, colours or specific techniques. You may provide a model sample yourself, or we can create one for you. Based on this, we determine the best route: Full Private Label, Semi Private Label or Print Private Label.

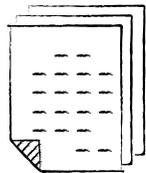

step 2 Design Phase

Based on the information collected during the orientation, we start creating the first designs for your private label collection. We create presentations to visualise styles and concepts, after which we discuss potential adjustments.

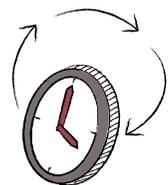

step 3 Material Selection

After the designs are approved, we select the right materials. We work with reliable partners to source high-quality fabrics and components that match your vision and quality requirements. Comfort and durability are essential — sustainability is one of our core values.

step 4 Quotation & Order Confirmation

Once materials are chosen, we prepare a quotation including all discussed details such as composition, techniques and lead time. Adjustments are still possible at this stage. When the size breakdown is confirmed and the quotation approved, everything is finalised in the order confirmation. After approval, the production process begins.

step 5 Production & Quality Control

From lab dips to pre-production samples: everything is carefully prepared and approved by you before production starts. We keep you updated throughout the process. Before shipment, each item is checked for sizing, stitching and finishing. Clear lead times? See the week-number overview on the next page of the brochure.

Details make the difference

Your clothing line gets extra character through our wide range of accessories, such as:

- private neck labels
- woven, printed or embroidered labels and badges
- silicone, faux leather or metal labels and badges
- various printing and embroidery techniques
- embossing or embossing combined with transfer
- branded buttons
- branded pullers
- premium neck tape
- multiple reflective detail options
- hangtags
- personalised packaging

Clear delivery times, no surprises

Our productions are planned per region. Thanks to long-term partners and our own sourcing offices in Bangladesh, China and the Middle East, we can communicate clear and reliable lead times.

Delivery schedule in week numbers*

Private Label Lemon & Soda

Semi Private Label

- choose from existing qualities and colours
- additional options such as:
 - private neck label
 - special neck tape
 - custom woven labels
 - badges, buttons, rubber logos
 - extra colourways
 - cut & sew details
 - many different decoration techniques
- more creative freedom with a low MOQ (from 150 pcs)
- ideal for customers who want more exclusivity

Semi Private Label combines speed with customisation and gives your collection a distinctive identity.

PRIVATE LABEL

PRIVATE LABEL

Print Private Label

Print Private Label is ideal when you need recognisable clothing quickly. Choose from our existing assortment and we add your logo, artwork or slogan using high-quality print or embroidery techniques.

Advantages:

- low entry level
- fast delivery
- low MOQ (from 25 pcs)
- competitive pricing
- professional printing & embroidery
- many optional extras (labelling, packaging, etc.)

Perfect when you need a recognisable, professional result quickly without changing the fit or construction.

Quality & Service

Before your order is shipped, we inspect each item for:

- sizing
- stitching
- finishing
- colour consistency
- logo & print quality

After delivery, we remain available for re-orders, expansions or adjustments.

We work with experienced factories in Bangladesh, China and the Middle East and apply strict quality controls.

Even after delivery, we stay involved to support with repeats or improvements for future collections.

Together we build your brand

With Private Label by Lemon & Soda, you create a clothing line that truly reflects who you are: sustainable, distinctive and professional. Curious about the possibilities? We'd be happy to think along with you. Custom clothing concepts for brands, companies & creators.

Additional info

An overview of different yarn

Single Jersey

Jersey, or tricot, is a fine and elastic knitting technique. The fabric is comfortable and stretchy. Single jersey is knitted in a right-left weave, with a v-pattern on the front of the fabric. So it has a clear front and back.

Elastane

A synthetic fiber that is exceptionally elastic. It differs from other synthetic fabrics because it is more elastic but at the same time stronger. Without tension, the fabric returns to its original shape. It is light in weight and the elasticity in elastane offers plenty of room to move, without losing fit.

Combed (organic) Cotton

After carding, the yarn is passed through a combing machine to remove the short fibres. This gives the finished fabric a silkier feel, making it softer, more resistant in the wash and more hard-wearing. It ensures smooth surfaces for decoration access.

Ring-spun Cotton

Ring-spun cotton T-shirts are thinner, smoother and softer than regular 100% cotton T-shirts. It feels like it has been washed dozens of times. This is because the yarn is spun in such a way that it produces stronger, longer and thinner cotton strands.

Ring-spun Combed Cotton

Undergoes a final step before the fabric is woven. The fibres produced during combing are thinned and twisted, which produces a softer, more resistant yarn that is less susceptible to shrinkage. Ideal for high-quality printing.

Piqué

This technique creates a sturdy, breathable fabric with a small relief. Piqué is widely used for polo shirts. Traditionally piqué fabric was made only from cotton, but nowadays it is mixed with synthetics to create more strength. The difference with jersey is that piqué fabric is a bit firmer and thicker.

Recycled Polyester

Recycled polyester offers the same high-quality characteristics as conventional polyester but with a smaller environmental footprint. The production of recycled polyester requires far less energy, causes significantly less CO² emissions and helps keeping plastic waste from going to landfills and our oceans.

ACTIVE-DRY° Polyester

This fabric dries quickly, has excellent moisture management, feels soft and is very elastic. Therefore it is perfectly suitable for sports and functional clothing. The airy fabrics are very moisture-wicking and provide a pleasant feeling, even during intensive training. ACTIVE-DRY° polyester not only offers great wearing comfort, but is also ideal for various textile finishes.

Bird-eyelet Mesh

Birdseye mesh fabric is a breathable textile commonly used in sportswear. With an open structure, it ensures good air circulation, moisture regulation, and quick drying. Lightweight and durable, it is often employed in sports shirts and pants for maximum comfort during intense activities.

Interlock

A knitted cotton, also called double jersey, because two layers are knitted together. Unprinted, both sides are therefore the same and there is actually no right or wrong side. After printing, of course, but the inside feels just as soft.

Nylon

Smooth, moisture-wicking and very durable fabric, making the perfect choice for athletic and outdoor clothing. Nylon is one of the lightest textile fibres and at the same time one of the strongest. Thanks to its high elasticity and moisture-wicking properties, nylon textiles offer great wearing comfort and excellent freedom of movement.

Viscose

A high-quality material made from the natural raw material cellulose. The fibre is very soft to the touch, moisture absorbent and very breathable. It can be both glossy and matt and thus take on the look of wool, silk or cotton. T-shirts with a viscose share drape fluidly around your body, creating a premium wearing-comfort as well as an elegant, flattering silhouette.

Fleece

Fleece is popular and indispensable companions in everyday life or for outdoor activities, as they provide strong insulation and can absorb and release moisture very well. They are light, breathable and keep you pleasantly warm even in cooler weather. There are many different kinds of fleece fabrics.

Softshell

The outstanding features of softshell styles are their light weight and the combination of three layers in one garment. Softshell combines an outer layer to protect against wind and weather with a breathable membrane and soft micro fleece on the inside. Therefore, softshell products are wind-, water- and dirt-repellent. The pleasantly stretchy material ensures a high level of wearing comfort.

Full Feeder Yarn

Yarn feeder for weft knitting machine. A yarn feeder comprises a switching mechanism which presets a swing direction of the yarn feeding port after completion of a yarn feeding operation, and, after having completed yarn feeding operation, changes over the swing of the yarn feeding port from one yarn feeding position to another standby position interlocking.

Additional info

Careguide

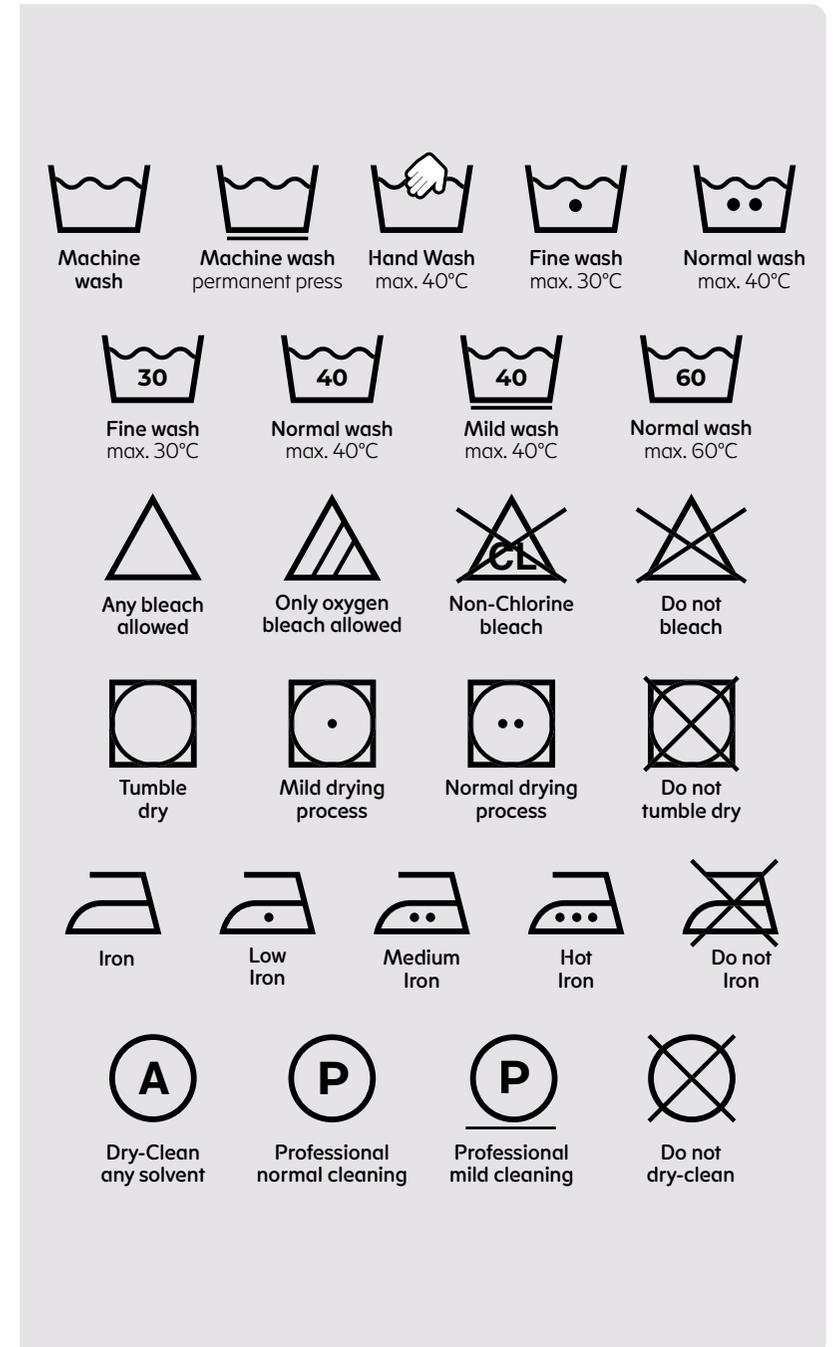

We care about the garments that we produce, so we choose our materials very carefully. Follow the instructions on the care label to enjoy these garments even more!

Washing tips

- Always read and follow the care label
- Read and follow the instructions on your detergent pack
- Use the recommended amount
- Polar fleece and sweats can best be washed before wearing
- Wash inside out
- Close zippers before washing
- Sort laundry by temperature in care label, 40 °C, 60 °C etc.
- Wash dark colours separate
- Don't iron on decorations
- Always wash a full load
- Pre-washing is not needed for most garments
- If you have a condenser dryer, reuse the water – it's great in irons

Washing & the environment

Washing and drying at home represents 75% of the energy used in a garment's life cycle, so it really is an area where you have an impact on the environment. For the best cleaning, we recommend washing your clothes at the temperature indicated on the care label. Often a piece of clothing only needs to be refreshed instead of cleaned and washing at 30°C is fine. Natural line drying reduces the amount of energy used in the aftercare process. However, it is not always practical and that is why many people use tumble dryers. When purchasing a dryer, think about a good energy classification so that you use the energy in the most efficient way.

Visible online

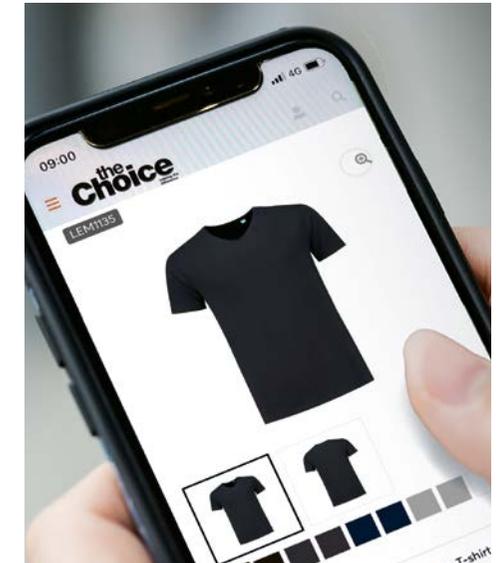

In addition to our webshop promotionalbrands.eu, we have two other thriving websites;

- lemon-soda.eu

- privatelabelconcept.nl

Promotional brands is a website from a sustainable thought, among other things; only prices are listed for the end user, so everyone can view this neutral website. It is actually an online brochure, so there is no unnecessary paper consumption.

All our current catalogs and flyers can also be found online as browsing catalogs.

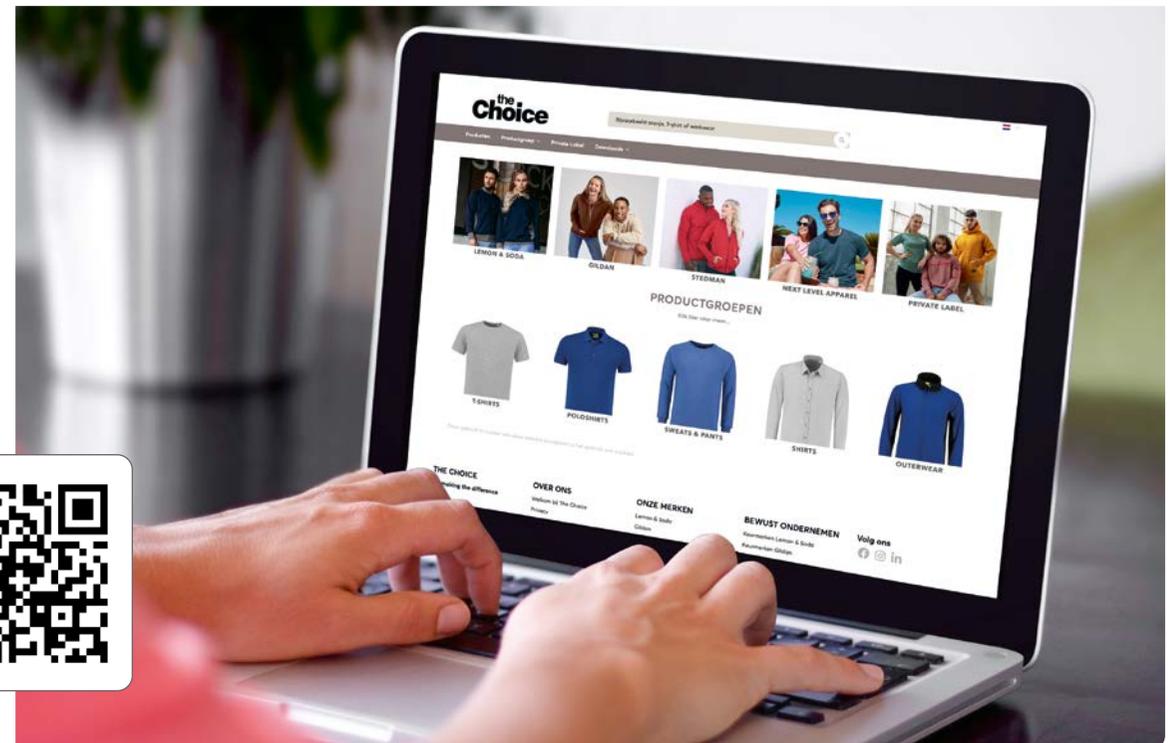

Additional tool to serve the customer

Promotional brands is a user-friendly website, prices are stated for the end user, for everyone to view this neutral website.

Handy, easy & clear!
